

SPRUCE GROVE'S CLIMATE CHANGE ACTION PLAN (CCAP)

The CCAP describes how Spruce Grove will prepare for the impacts of a changing local climate while also contributing to our collective goal of limiting future climate change.

WHAT IS CLIMATE ADAPTATION?

Climate adaptation focuses on building resilience and adjusting to climate changes that are projected to occur in the future and those that are already happening.

CLIMATE RISKS IN SPRUCE GROVE

The following climate hazards will require us to take adaptation action.

Hotter Summers

Warmer Winters

Water Stress

More Extreme Weather

WHERE CAN I TAKE ACTION?

Resilient Vegetation

Water Management

Resilient Homes

Emergency Preparedness

WHAT CAN I DO?

Plant climate resilient species.

Monitor outdoor air quality and improve indoor air quality.

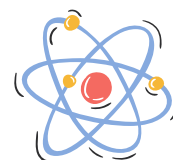

Implement climate resilient home guidelines.

Grow your own food.

Incorporate the 3 Rs into your home.

Support citizen science.

Prevent the spread of invasive species.

Improve severe weather emergency preparedness.

Conserve water.
