Learn how to recognize Dutch Elm Disease and how to prevent it!

What is Dutch Elm Disease? It's a deadly disease that affects all species of elm trees and is caused by a fungus that is then spread by beetles. Symptoms include: leaves suddenly wilting, leaves changing colour and shriveling but not falling, and discolouration once the bark is peeled back.

It's only legal to prune elms in Alberta between October 1 to March 31. Pruning outside of this range can attract Elm Bark Beetles to your otherwise healthy tree, infecting it.

If you think your tree may be infected or need more information, visit Sprucegrove.org/DutchElmDisease.

Stay off the ice!

Spruce Grove's stormwater management facilities are not a good place to go for a skate or take the dog for a walk. Constant water flow causes the ice to be unstable and unpredictable. Stormwater facilities are not safe for people or pets and access is prohibited at all times. Learn more at sprucegrove.org/StormwaterSafety.
